

Dr. Jan V. Raiman und Kollegen

Fachzahnarztpraxis für Kieferorthopädie in Hannover-Kleefeld

Patient Information

*Because smiling is
the most beautiful way
for teeth to be shown...*

Modern technology as well as long-lasting experience and knowledge enable us to give comprehensive advices to every patient and offer the most efficient treatment for all age groups.

Already in the **kindergarten age** it is important to look for a clear articulation and correct positioning of the tongue in order to enable undisturbed growing of the upper and lower jaw as well as the teeth. We provide support with small custom-made removable functional appliances and by cooperating with logopedic therapists.

Usually teenagers wear conventional removable and fixed appliances. For higher comfort and aesthetics we offer the Invisalign® technology and lingual braces as **invisible solutions** to teenagers as well as to our **adult patients** – because beautiful straight teeth aren't a matter of age!
Digital radiography, which is the new state-of-the-art, enables us to reduce the x-ray exposure by 80%.

Come and visit our office, become acquainted with our team and the doctors, catch up on the different possibilities in recent orthodontics. Together we will find the best answer to your problem.

... for a good feeling!
